GOVERNMENT INSURANCE

It Is Offering It To The Men In Part Payment For Their Services.

The Government is now conducting an active campaign to urge and influence the men who have been in the service to continue their Government Insurance and for this purpose have stationed men in all the larger cities to give information and advise to the men. Ensign McNeff, U. S. N. R. F. is representing the War Risk Insurance Bureau in Kentucky, with headquarters at the Navy Recruiting Station, Louisville, Ky.

The Government is doing a wonderful work in offering this Insurance to its former fighting men and it is from no selfish motives. It is offering it to the men in part payment for their services which were rendered during the war and the men should realize that it is a valuable right and privilege which once thrown away can never be regained.

During the war the men were given what is called Term Insurance which they may carry for a period of five years after peace is declared with the privilege of converting, within that time, into six standard forms of policies viz. Ordinary Life, 20 Payment Life, 30 Payment Life, 20 Year Endowment, 30 Year Endowment and Endowment maturing at age of 62. The rates on these new policies are the cheapest that have ever been offered for the reason that there is no expense attached to it.

All expenses being paid out of a separate fund and in addition to being low the Government will pay dividends, which no doubt will be substantial, for the same reason. All of the clauses of these policies are the most liberal than can be made and for which no extra charge is made. One feature in particular is the disability clause, which protects the men for the entire life of the policy, which in the case of an ordinary life or 20 or 30 payment life would be for the whole of life. The disability may occur at any age and if permanent the Government will waive premiums and pay the policy holder \$5.75 for each thousand of insurance carried.

The Government during the war had on its books some 4,500,000 men with a policy value of \$38,000,000,000 averaging \$8,000 for each man. It is the hope that most of these men will retain and it is a patriotic duty for all to see that our former fighting men continue this insurance.

Returns From Overseas

Buras, Ky., May 26, (Special To The News)—Mrs. Tillie Coombs and son, Lieut. Samuel T. Coombs have returned to their home in Louisville, after an extended visit to her son Herbert G. Coombs. Lieut. Coombs has just returned from overseas after one year of service for his country.

Visitors

Miss Effie Norton and Miss Lattie Norton, of Norton's Valley, and Miss Gertrude Falls, of Owensboro, were guests of Mr. and Mrs. Austin Arms, near Hardinsburg, last week.

Take Notice!

All Knights of Pythias, on Sunday, June 8th at 2:00 P. M. the members of Breckinridge Lodge No. 61 will meet at their hall and from thence proceed to the cemetery where Decoration services will be held for honored dead. Each member earnestly urged to attend.

\$3,400 SUBSCRIBED FOR CENTENARY

Cloverport Methodist Church Goes Over Net Quota. \$1000 Memorial Fund Given.

The Cloverport Methodist church opened its campaign last Sunday morning to raise its quota of \$4,680 for the Methodist Mission Centenary to be subscribed in five years time. Mr. D. C. Stimpson, of Owensboro, gave an address at the eleven o'clock service on Sunday in interest of the drive, and at the close of his very inspiring talk, volunteer subscriptions were made by members of the church. The largest subscription made was the \$1,000 memorial fund given for the late William H. Bowmer by his widow.

On Tuesday morning, chairman David B. Phelps announced that he had received pledges that amounted to about \$3,400 and there were still more to be received. The assessed quota for the church is \$4,680. The Conference Claims, etc., which the church pay annually are credited to the quota therefore the approximate net quota to be raised amounts to about \$2,500. The object of each church is to raise its required assessment.

81ST F. A. SEEKING RECRUITS IN KY.

Advance Party in Charge of Capt. Howard to Arrive in Cloverport, Wednesday.

Something just a little out of the ordinary for Cloverport, will happen this week when the recruiting outfit of the 81st, Field Artillery from Camp Knox, Ky., will make its appearance in this city either Tuesday afternoon or Wednesday. The party is making a tour through Kentucky by land, and Sunday it arrived in Hardinsburg, where on Monday an exhibition of fire arms was made before an immense crowd of people from over the county.

The object of this recruiting party is to enlist one thousand Kentucky men into three years army service, and thereby fill up the ranks of the 81st, Field Artillery. Capt. Howard is in charge of the advance party and Capt. Beaver is in command of the Battery. In all there are about forty soldiers included in the outfit and they have with them 2 White Staff cars, 1 Nash-quad Ammunition truck, 3 ton; 2 Pierce-Arrow trucks, 2 ton; 1-ton Traction; 4 F. W. D. Ammunition trucks, 3 ton; 1 Ford touring car; 4 American 75 M. M. field pieces; 4 carbons for American 75's.

Take Notice!

All Knights of Pythias, on Sunday, June 8th at 2:00 P. M. the members of Breckinridge Lodge No. 61 will meet at their hall and from thence proceed to the cemetery where Decoration services will be held for honored dead. Each member earnestly urged to attend.

SCHOOL NEWS AND VIEWS

By J. Raleigh Meador, Superintendent.

Forty-two applicants presented themselves to be examined for Common School Diploma on May 9, and 10. Of that number twenty-five were successful in making passing grades.

The highest General Average, 91.75, was made by W. J. Couch, of Cloverport, and the second highest, 95.5, by Lucile Brumington, of Harned. The prizes offered by Mr. Logan Hickerson have been mailed to these two applicants.

Fifty teachers took the examination in Agriculture on Saturday of last week. Only fifteen took the entire examination, and of that number ten made First Grade certificates, two made Second Grade, and three failed to make a passing grade.

The next regular examination for white teachers will be held on June 20, and 21. The subject of Agriculture will be the last subject on Saturday, the second day. Every teacher who teaches in a public school in Breckinridge county next year must first pass this examination in Agriculture.

An All Day Meeting.

Of The Kentucky Baptist Children's Home, Held in Glendale, Hardin County.

Cecilia, Ky., May 26, 1919. (Special) —The fourth annual meeting of the Kentucky Baptist children's home will be held on Wednesday, May 28, near Glendale, Hardin county, Ky. The meeting will hold all day and there will be addresses by prominent speakers, also an interesting programme rendered by the children of the Home. Lunch will be served on the ground for all who attend.

Married In Stephensport.

Stephensport, Ky., May 26, (Special) —The marriage of Miss Atoma Matthews and Mr. John Butler, both of Owensboro, took place here Tuesday evening at the home of Mr. and Mrs. Chas. B. Waggoner. The Rev. C. B. Gentry performed the ceremony in the presence of a few friends and relatives. Mr. and Mrs. Butler left Wednesday for their home in Owensboro.

Building a Grain Elevator.

Messrs. Squires and Bandy, owners of the Cloverport Flour Mill Company have released a contract for building a new grain elevator with a capacity of 12,000 bushels of grain. The elevator is in the course of construction now and is located on the same lot near the flour mill.

Accepts Position In Louisville.

Owen C. Bruner has resigned his position with The Bank of Hardinsburg & Trust Co. He has accepted a position as bookkeeper with the Louisville Provision Co.

Say Owensboro And Louisville Highway Is Now Assured

Louisville, Ky., May 23.—Delegates from Jefferson, Breckinridge, Hancock, Daviess, Henderson, Union, Livingston, Webster, McLean and Ohio counties, at a meeting at the courthouse presided over by County Judge G. W. Newman, of Hancock, reported that funds were being raised in their counties which assures the building of the river route road between Louisville and Owensboro, which project is backed by the Louisville Automobile club. The route which is not mentioned at yesterday's session, will probably be discussed at the next meeting to be held in Owensboro, June 10.

Judge Newman, who is chairman of the Ohio River Road association, and Rodman Wiley, state highway commissioner, announced that by July 1, federal funds to aid building in Kentucky would have been used to the amount of \$600,000, leaving \$960,000 of the federal funds remaining for construction during 1919-1920.

The benefits derived from patrolling the roads in Jefferson county were shown to a number of county judges and road engineers yesterday during an inspection trip given under the auspices of the Jefferson county fiscal court.

Annual Meeting

The annual meeting will be held at Lost Run church, Sunday, Aug. 31, Rev. DeHart will conduct the services. Everybody cordially invited. Dinner on the ground.

AWARDED DAMAGES

Satterfield Heirs Recover Damages From Joe Mullen--Suit Bitterly Contested.

A suit of much interest was tried out in Circuit Court last week. The style of the suit was Thos. Satterfield, et al. vs. Joe Mullen, and a jury decided in favor of the Satterfield heirs.

Joe Mullen, whose farm adjoins that of the Satterfield heirs, claimed that they had more land than their deed called for and that the division line took in about three acres that belonged to him and the suit followed.

Pending the suit Mullen cleared the ground and farmed it wholly against the wishes of the Satterfields, and converted the proceeds therefrom to his use.

The suit was bitterly contested by the attorneys. Gus Brown and W. S. Ball representing Mullen and Claud Mercer that of the Satterfield heirs.

A jury decided that the Satterfield heirs were entitled to \$200 damages and that Mullen must pay all court costs, which amounts to quite a little sum.

In Memory Of Mother.

On the fifth day of May 1919, God in His wisdom took from us our dear wife and mother, Mrs. Milton Squires. She died at the age of 62 years, 7 months and 20 days. The end came quietly and with a smile upon her face as she fell asleep in Jesus. She realized her going home and leaving us, and her last prayer was that the Lord might bless her family with health.

As a wife she was kind and devoted to her husband, was a kind and loving mother to her children. She loved all of her neighbors and friends, and always willing to do all in her power to assist the sick and those who were in distress.

Yes, mother has gone home but not forgotten. Oh, how we miss Mother's tender care and vacant chair! But may God give us grace to bare all of our burdens, and by her going cause us to take new courage and to try to make better men and women, stronger in faith and love to God. May we children do all in our power to comfort and cheer father in his sad and lonely hours in having given up his dear companion.

"Safe in the arms of Jesus,
Freed from all earthly care;
Awaiting the Master's summons,
To loved ones over there.
Singing the Master's praises
One of the host redeemed,
Taking God at his promises
Makes even death a dream."
Written by her son and daughter,
Dennie and Eula Squires.

Elephant Hunting.

In Ceylon elephants are hunted chiefly for sport, as they do not bear so much ivory as the elephants of Africa and elsewhere.

Granted And Thank You Too
Mr. J. D. Babbage, Cloverport, Ky.
Please pardon my neglect in not renewing before now. Find enclosed money order for \$1.50 for which send the Breckinridge News dating from March 15. Thanking you for past favors, I will close wishing the News and all of its readers success. Respectfully, Mrs. Porter Atwood, Alex., Ill.

FIVE GRADUATES GIVEN DIPLOMAS

Commencement Exercises Of C. H. S. Held Wednesday Eve In Methodist Church.

The annual commencement exercises of the Cloverport High School held in the Methodist church, Wednesday evening, were very largely attended this year by the patrons of the school and those interested in the ones receiving their diplomas.

The church was very attractively decorated in the class colors, silver and majento. These colors festooned the electroliers, and were used in the class motto, "No Victory Without Labor," which decorated the wall near the platform. Seated on the platform were the five graduates, Misses Lora N. Carson, Chloria Mae Seaton, Cecil Jolly and Louise B. Weatherholt, Joseph Ballman. The Superintendent, O. F. Galloway; Miss Mary Owen Oelze, Prof. J. T. C. Noe, Rev. W. O. Rickard and Rev. A. N. Couch.

The sweet girl graduates looked charming in their dainty white frocks and each wore a corsage of pink sweet peas.

After receiving their diplomas the graduates were profusely showered with flowers and gifts carried by the flower girls who were: Misses Eva Wroe, Eva Jolly, Margaret Sutton, Eleanor Reid and Gladys Hemphill.

Prof. J. T. C. Noe, A. M., who is head of the Department of Education of the State University delivered the class address. Prof. Noe's address was exceedingly interesting and perhaps the part enjoyed most by his audience was the reading of one of his original poems.

The programme was good from beginning to end and it included the following numbers:

Invocation Rev. A. N. Couch

(a) Through Ripples Bright

Former Kentucky Girl

Graduates In Texas.

Mr. and Mrs. Hilary Hardin, of this city have received an invitation to the commencement exercises of the Southwestern Junior College to be held May 24, 25 and 26, at the Seventh-day Adventist church, Keene, Texas. The invitation was sent by Miss Elizabeth Skillman McGavock, daughter of Mr. and Mrs. John McGavock of Walters, Oklahoma, formerly of Kentucky, and a niece of Messrs. Leon and Marion McGavock, of this city.

Hites Run People

Ready For Good Roads.

A very enthusiastic meeting in the interest of good roads was held at Hites Run, Monday evening and the people of that neighborhood declared themselves ready both mentally and financially for good roads. They the money, and if that is all it takes to get a federal highway through Hites Run, they feel assured of the possibility.

Representatives from Hardinsburg and Cloverport, were in attendance at the meeting and altogether there was a very good crowd.

Soya Bean Oil Production.

Soya bean oil, which originates principally in Manchuria, is almost entirely controlled by Japanese. The supply of beans last year was very large and the amount of oil turned out was limited only by the capacity of mills. A number of large new plants were started both in Manchuria and Japan and most of the already established mills increased their capacity.

Cary Lyle Tolle Dies

Mr. Cary Lyle Tolle, aged 33 years, died at his home in Jonesboro, Ark., of complications following influenza. The remains, accompanied by his wife and her brother, Frank Ferris Lamb, were taken to Ohio for burial. Mrs. Tolle was formerly Miss Maie Lamb of this city.

Tennessee Sergeant Hailed "Greatest Soldier In History"

New York, May 23.—Sergeant Alvin C. York, of Pall Mall, Tenn., who received the congressional medal of honor for the mightiest single handed achievement of the war, in which he killed twenty Germans, took 132 or more prisoners and put thirty-six enemy machine gun nests out of business in the Argonne, was proclaimed a hero by all New York today. At a banquet at Hotel Waldorf-Astoria tonight he was proclaimed the "greatest soldier in history."

At the table he was flanked on either side by Major George Duncan, commander of the 82nd division, in which York fought, and Vice Admiral Albert Gleaves, commander of the cruiser and transport forces of the navy.

The first words of the German major captured by York, when he rounded up 132 prisoners in the Argonne forest were told by General Duncan: "British?" asked the German major. "American!" said Sergeant York. "Good Lord," exclaimed the major.

THE
FRIENDLY
TOBACCO

Horse Sense About Tobacco

Good tobacco ought to be like a well-bred hoss—all th' kick taken out but all th' spirit left in.

You see, half the secret of makin' a good hoss is in the breedin' an' half in the breakin'. Selectin' tobacco that's grown right is only *half* of makin' Velvet. The agein' is the other half.

Thar's only one kind of agein' that gets th' right results—*Nature's own*. Nature's no clock watcher. She does a job *right* whether it takes two years or two thousand.

So when she gets through with the fine Kentucky Burley that we put away in wooden hogsheads for two years, it's just *right*.

It ain't been hurried none, or short-cut. It's a Nature-done job.

All kinds of things are packed in tobacco tins, but your good neighbor will tell you "Velvet is the real pipe tobacco." Prove it for yourself.

Roll a VELVET Cigarette

from overseas, spent Monday with Mr. and Mrs. Ben Dowell.

Miss Laura Mell Stith spent Wednesday night with Miss Louise Hardaway.

We are glad to report G. A. Foote able to be up some after a severe attack of rheumatism.

Miss Bertha Foote has returned home after an extended visit in Brandenburg with her sister, Mrs. John Bircher.

There will be Children's Day at the M. E. church first Sunday in June.

Everyone is welcome to this service. Miss Roberts Triplet has returned home after a visit to her grandmother, Mrs. Thos. Anderson, of Guston.

The Centenary meeting at this place was quite success, having raised \$3,478 in subscriptions and money.

Mr. and Mrs. Boyd Keith are receiving congratulations upon the arrival of a boy, born May 10, James William Keith.

The farmers are busy shearing sheep, getting wool ready for the market, Saturday, May 31st.

Rev. Smoke, of Louisville, filled the Baptist pulpit here Saturday and Sunday.

BIG SPRING

Sherman Tucker has arrived home from overseas.

Lewis Clarkson arrived at New Port News, Wednesday. His parents, Mr. and Mrs. J. V. Clarkson are looking for him home soon.

J. H. Meador left Friday for Louisville, to attend the races.

The Third Quarterly meeting for the Big Spring Circuit, will be held May's Grove, May 31, and June 1.

Miss Lilly Mae Scott has returned from a visit with her daughter, Mrs. Will Miller, of Louisville.

B. S. Clarkson entertained for the week-end, Mr. and Mrs. Kerby Chambers, Mrs. Tyler and little son, of Louisville.

The good roads meeting was very well attended considering the day. All seemed to enjoy the barbecued pork and mutton, furnished by B. S. Clarkson. The cakes, pies etc. by the ladies and after lunch the speeches. Sorry more people were not out.

Rev. Ray, of Constantine, will fill his appointment at the Baptist church Saturday and Sunday.

Last Monday Mr. Jim Norris ploughed up a snake known as a hoop snake, three feet long. On the end of its tail was a horn about one and a half inches long. First of the kind that has been seen or heard of in years.

Mr. Rowland Whitworth is quite ill at this writing.

Mrs. C. B. Witt and little niece, have returned from a short visit to her father, Mr. Vogt, in Louisville.

HAS NEW IDEA IN SCULPTURE

Tennessee Girl Uses Dried Apples to Fashion Her Models of the Human Form Divine.

Down in Knoxville, Tenn., lives Miss Isabel Million, who has created a new and distinct art. To be brief, she has developed dried apple sculpture with remarkable results.

For years Miss Million has been interested in the various types of mountaineers who come down to her father's store to trade. Having artistic ability, she tried a good many times to model their quaint and weather-beaten faces by the conventional methods of sculpture, but the results did not satisfy her. One evening, while cutting apples to dry them for the future, she picked up a piece of partially dried apple and noted its striking resemblance to the wrinkled face of the usual elderly mountaineer, whom she was endeavoring to portray.

Taking up a sharp knife, she did a little cutting so as to fashion the wrinkled apple into a human face. The outcome was most successful: she saw possibilities in this newly discovered art; and she set to work experimenting in dried apple sculpture. Little by little she became quite expert in making dolls whose heads are simply dried apples, cleverly cut before they are dried.

Miss Million has found a satisfactory preservative with which she varnishes the dried apple heads when they have reached the desired state of dryness. The costumes and accessories are carefully copied from life; indeed, Miss Million always has some particular person in mind when she evolves a little doll with a dried apple face.—Scientific American.

Electrocutes Leopard to Save Pelt,
A leopard used by a motion-picture concern recently took to sulking, which made him a disagreeable companion for the actors in the jungle scenes, according to Popular Mechanics Magazine. Shooting him with a high-powered rifle was first considered, but was objected to, as it would disfigure the valuable pelt. To avoid this, electrocution was decided upon, using power from a near-by station.

PUREBRED BULLS COST LESS THAN SCRUBS; WORTH INFINITELY MORE

Cooperative Bull Association Solves Problem Of Improving Dairy Herd Without the Heavy Expense of Owning Purebred Sires

Practically all of the 23,000,000 of cattle; and in many other ways dairy cows in the United States can help in putting the dairy business of being bred to pure-bred sires at less cost than grade bulls are costing their communities on a more profit-owners at present, declare specialists in the U. S. Department of Agriculture. Not only that, but the amount of dairy products can in a few years be greatly increased without increasing the number of dairy cows or the cost of production. How can this be done? Simply by discarding all grade and scrub bulls and breeding dairy cows to nothing but good pure-bred sires with ancestors possessing high-production records.

"But I can't afford to own a purebred bull," says Mr. Average Farmer. "I keep only six cows. There isn't a pure-bred bull within 10 miles of my farm. I can't afford either the time or the money to take my cows to the only available pure-bred bull near me. So how can I hope to improve my dairy cattle and increase

dairy cows to nothing but good pure-bred sires are in demand. To prevent inbreeding, bulls are interchanged every two years. The same bulls can thus be used for 10 years in one association. This gives plenty of time to determine a bull's real value, and to select the offspring of the best bulls for breeding purpose or the money to take my cows to the only available pure-bred bull near me. So how can I hope to improve my dairy cattle and increase

Thus, at small cost, a pure-bred bull for every 30 to 80 cows is provided for 10 years. The only cost,

(Above) The "Expensive" Scrub Bull Used on Too Many Farms. (Below) A Good Type of Dairy Bull Such as Cooperative Bull Association Use.

the production of milk without increasing the number of cows I keep?" after the bulls are paid for, is the cost of keeping the bulls.

The community bull association is the answer to Mr. Average Farmer's question. While few farmers can afford to own or use a \$1,000 bull, any farmer can afford to own a share in one, even if he owns only 4 or 5 cows. By belonging to a bull association every farmer can use good, purebred bulls no matter what size his dairy herd. In fact, it is less expensive than using a scrub bull.

Community-Breeding Successful

The Dairy Division of the U. S. Department of Agriculture started organizing bull associations 4 years ago. There are now 55 such associations successfully operating in 21 States. Progressive farmers are quick to see the advantages of the plan once it is explained to them. It is simply an organization of farmers for the joint ownership, use, and exchange of high-class pure-bred bulls.

These societies also encourage careful selection of cows and calves; introduce better methods of feeding and housing; assist their members in marketing dairy stock and dairy products;

protect the contagious diseases after the bulls are paid for, is the cost of keeping the bulls.

The purchase price and the expense of keeping the bulls are distributed among the members of the association according to the number of cows owned by each. It is easily seen that an assessment of \$10 per cow (amounting to \$1 a year for ten years) will do in providing good bulls.

Such bulls build up his dairy herd and increase the production of milk without increasing his expense. Farmers belonging to bull associations, when questioned regarding the value of these societies, estimated that the use of bulls belonging to the organization increased the value of the offspring in the first generation from 30 to 80 per cent, with an average of 65 per cent.

A good bull's influence on the herd will be noticeable for many generations. Likewise, the damage done by an inferior bull will be equally great. No other argument should be necessary to convince every owner of dairy cows that he should join a bull association.

These societies also encourage careful selection of cows and calves; introduce better methods of feeding and housing; assist their members in marketing dairy stock and dairy products;

protect the contagious diseases after the bulls are paid for, is the cost of keeping the bulls.

The community bull association is the answer to Mr. Average Farmer's question. While few farmers can afford to own or use a \$1,000 bull, any farmer can afford to own a share in one, even if he owns only 4 or 5 cows. protect the contagious diseases after the bulls are paid for, is the cost of keeping the bulls.

The community bull association is the answer to Mr. Average Farmer's question. While few farmers can afford to own or use a \$1,000 bull, any farmer can afford to own a share in one, even if he owns only 4 or 5 cows. By belonging to a bull association every farmer can use good, purebred bulls no matter what size his dairy herd. In fact, it is less expensive than using a scrub bull.

These societies also encourage careful selection of cows and calves; introduce better methods of feeding and housing; assist their members in marketing dairy stock and dairy products;

CLOVERPORT

MAY 28, 1919

For over forty years we have been preaching and advocating good roads. In season and out. When roads were good and when the mud was deep and stiff we have been right on our job. The action of the voters of this county in voting the road tax by almost a unanimous vote did our heart and soul good. We congratulate the good people of Breckenridge county on their wise and progressive move. It means much for the county. Now let's get together and every man of us put our shoulder to the wheel and push for good roads. It doesn't matter where they begin or where they end, let us be for them and help with work, with money and with good words.

The Louisville, Henderson & St. Louis Railroad are giving farmers some practical suggestions in their advertisement this week. Every farmer should read it and adopt the suggestions in his business. The managers of the Henderson Route are interested in the work of the farmer. The more the farmer produces the more business there is for the railroad and the more money for the farmer. System is the keynote to success in any business.

Let's have a little civic pride and clean the streets and alleys. The good health of the community demands it. A town without a little pride soon becomes a sleepy town and business disappears where filth and weeds flourish. If the city treasury is empty a proclamation should be issued giving old Pidg the right to roam about. She will mow the weeds free gratis.

John D. 3rd.

Meet John D. Babbage, Jr., who will some day make his mark in the printing trade. His father is the New England manager of the Miller Saw Trimmer Company, with headquarters in Boston,

With the seventeen-year-locust, the cut worm and continued rains, the farmers are becoming discouraged as to the crop outlook. Job had his troubles in his time, but slightly of a different nature, for it isn't chronicled that he cut bushes with a dull hoe or plowed a contrary mule. The farmers are a cheery lot and their patience are equal to that of Job's.

Diamond Cutters.

There are 25,000 diamond cutters and polishers in the world. Of these only about 675 are in the United States, and these have come mostly since the outbreak of the European war, which crippled the industry in Amsterdam and Antwerp, the world's greatest centers. There were at the beginning of the present year 36 diamond-cutting establishments in this country. This is exclusive of shops where all kinds of precious stones are cut.

The number of Germans employed as diamond cutters did not exceed 600 before the war, and of these only 75 per cent worked for establishments in Germany. During the war 600 or 700 Belgian cutters emigrated to England and organized as a branch of the London Diamond Cutters' Union. They did work principally for Belgian and Russian houses.

UNION STAR

Horace McCoy was in the Chenault neighborhood last Friday.

L. B. Hall of Chenault, was in town one day last week calling on friends.

Orville McCoy spent the week-end in Owensesboro, the guest of relatives and friends.

Clover Creek Farm Product.

J. N. Conkwright bought of W. W. Pitts, Lewisburg, Tenn., 2 fine Hampshire gilts for \$85.

A WOMAN WHO WOULD GAMBLE.

Odd, pathetic, distressing letters come to men in Wall Street. One the other day was from a woman, with a husband and two children. "My husband is hard working and I have saved up \$300," she said. "He does not know of it and I would like to speculate and try to make a little more money for business is not very good here and we are saving so hard and trying to build our own home, so I thought I would write to you. I know I won't have to be afraid of my money and I would like to surprise my husband. Do you think puts and calls or a spread are safe? I read so much of them and about pools but it never gives the names of the gentlemen that are in them. I can bring my money at any time you hear of something going up. I read of Mr. — who made a fortune but I can't understand how he does it. I know I can't make as Mr. — but I am trying so hard to help my husband, and I know nothing ventured nothing gained."

This woman lives in the country, in a small town not 100 miles from New York. Everyone whose name is associated with Wall Street gets letters of this character. Somehow the great mass of the public thinks that for a man to be in or of Wall Street gives peculiar advantages to him.

The present writer has been in touch with Wall Street for more than 40 years. He has known thousands of persons to play the market. He has known few to win and retain their winnings. The nearer you are to the machine, not infrequently the poorer your judgement. Not one person out of a hundred who plays the market regularly profits. The person who speculates is certain to be eaten up by the "kitty." No one ever devised a system to beat the game that has stood the test. The master manipulator of the market has been extremely fortunate when he could guess the market 3 times out of 5.

No wall Street house of respectability wants the speculative account of a woman. No man of decency would take \$300 of that foolish woman and gamble with it. Unfortunately every human being has a desire for quick profits, for reward without effort, for gain through the windfall of chance. Woman, perhaps, have the gambling instinct more than men. They repress and hide it but they have it. They believe in their luck and have queer superstitions. The man in Wall Street who trades for woman is deserving of sympathy, for women as a rule are bad losers.

This woman with the \$300 had better put her money into Liberty bonds or the Savings Bank where it will be safe. But, first of all she should inform her husband that she has the money. No form of deception between husband and wife is likely to bring good results. She is deceiving him now. She had better not read

of Wall Street—get Wall Street out of her mind. It is not for her or anyone like her. It is not a healthy place. It has its legitimate function but that is not in the realm of gambling.

The wise men of Wall Street do not play the game. They leave that to the others, who are not so wise. And of the latter there is a multitude always eager, always hopeful and always sorrowful in the end.

There never was so fat a "kitty" as that of Wall Street for it laps up an average \$125,000 a day.—Richard Spillane in Commerce and Finance.

FRYMIRE

E. R. Cart was in Concordia on business last week.

Owing to the rain last week the farmers are behind with their work.

Claude Dodson and Morton Barr were in Irvington last Saturday having dental work done.

Owen C. Bruner, of Hardinsburg, spent Saturday night with his father, R. Bruner.

H. L. Bruner, of Louisville, spent Saturday and Sunday with friends here.

Several from here attended services at Raymond last Sunday.

Mrs. Jacie Barr returned home Saturday after spending several days with Miss Ida Wheeler.

Miss Mabel Stiff, of Raymond, spent Wednesday night with her cousin, Mrs. Otis Severs.

Mrs. Wallace Parks and little son, Jessie Hadin were in Brandenburg, last week having dental work done.

Mrs. Lee Miller and Mrs. Wallace Parks and little son, Jessie Hardin spent Tuesday afternoon with Mrs. Henry Summers.

Misses Leota Grant and Carrie Kelm spent the week-end with Mrs. Gus Barger and Mrs. Will Grant.

Stuyvesant Square

Though eople who scribble
And people who paint
Will argue and quibble
On which is more quaint,
The queer "Chelsea" section
Or "Greenwich," I swear
To keep my affection
For Stuyvesant Square!

The homes have old fashioned
And dignified charm,
With nothing impassioned
To jolt or alarm;
No tea rooms erratic
Have opened up there;
So poseurs, ecstatic
Shun Stuyvesant Square!

Oh, Thackeray knew it,
And Dickens as well:
These writers went through it,
Historians tell;
So somehow a fellow
Finds attributes rare:
The world all seems mellow
In Stuyvesant Square!
Harold Seton.

LETTERS WE APPRECIATE

Thank You Miss Gladness.

Mr. J. D. Babbage. Dear Sir: You will find enclosed (\$1.50) one dollar and fifty cents for which please send The Breckenridge News to the following address for one year. Miss Gladness M. Bruce, Lodiburg, Ky.

Thank You "Uncle" Pete.

Mr. J. D. Babbage. Dear "uncle" John: Enclosed find check for \$1.50. Renewal for The Breckenridge News one year. Yours resp't, Pete Sheeran, Ekron, Ky. Route 1.

Discontinues Paper.

Every Fire has Two Evils

LOSS caused by fire, and loss caused by water.

Putting out the fire often causes more damage than the fire. There are so many ways of losing through fire, that Fire Prevention becomes the big part of insurance. The Hartford Company realized this. They study Fire Prevention as an economic science, maintaining a staff of experienced Fire Engineers to pass on such problems. Every Hartford policy holder gets the benefit of their experience, inspection and recommendations, without cost. We offer you that service, as Hartford Agents.

Leitch, Jr., and Sally John Leitch, of Ben Aron, Penn., arrived Monday evening for a several weeks visit with Mrs. Leitch's mother, Mrs. Rebecca Lightfoot, and brother, Dr. Chas. Lightfoot. Mrs. Leitch was accompanied by Mr. Leitch, who will return shortly.

HILL ITEMS

Owing to the death of a near relative of the pastor, Rev. T. N. Williams there was no preaching at the Presbyterian church on Sunday the 18th as these items announced would be.

Miss Grace Armstrong, niece of Mr. J. H. McKinney, left last Monday for Mansfield, Ohio, where she will make a lengthy visit to relatives.

Charles Morton moved recently to Mrs. Lamb's house on the Hill.

Miss Adele Keil is in Tobinport, on a visit to Mrs. J. H. McKinney.

Mr. Felix Dunn and two sons of Hawesville, were here last Sunday to see Mr. Dunn's mother, Mrs. Mary Dunn.

Mrs. William Mullen is in Irvington, the guest of her daughter, Mrs. E. S. McAfee and Mr. McAfee.

Mr. Ben Dawson, who has just returned from the army has moved on the Hill in the house recently vacated by Mrs. Dunn.

Mrs. Will Perkins, of Dayton, Ohio, is here the guest of her daughter, Mrs. Bob. Wilson and her mother, Mrs. Lucy Pate.

GLEN DEAN

Rev Hogard preached at the Methodist church, Sunday night on the Centenary drive.

Miss Nell Moorman who has been teaching at Bowling Green is at home for three weeks and then will go to Chicago, to a summer school.

Miss Rena Carwile, came home from Irvington, Sunday.

Miss Ruth Mitchell, of Louisville, is visiting Miss Gertie Carwile.

D. C. Moorman, Jr., has returned from the army to his home here and purchased a car on his way home.

Marcus Withers' home and contents burned near here recently.

Misses Clara and Effie Witler are visiting relatives in Leitchfield.

Mrs. Oscar Pettie, of Narrows, Ky., visited here recently.

Jeff Davidson, of Detroit, Mich., spent a few days here the guest of his uncle, Thos. Fentress.

Jess Howard, Jr., was in Louisville, last week.

The two children of Mr. and Mrs. Allen Pierce are now better after being quite ill for a few days.

Mrs. Mabel Howard is expected to return from Washington, D. C., for a short vacation about July 15th.

Mrs. E. B. English will address the Baptist ladies on Monday, June 2nd, at the hotel with Mrs. R. W. Jones.

A measuring party will be given here soon. Watch for the date! All invited.

Japanese Idea of Music.

Among the Japanese especially, a directly divine origin is attributed to music. The mythical legend runs that the art was invented by the gods to appease the anger of the sun goddess and to induce her to shine once more upon the earth and upon the other divinities. The melodies which resulted were potent to prevail upon her, and thus was light restored to the world and music and dancing were given for its delight.

Graduates Honored

The members of the graduating class of the Cloverport High School were honored last week with picture show parties given them on Tuesday, Thursday and Saturday evenings. On Monday evening Miss Mary Owen Oelze was hostess to a theatre party; Thursday, Mr. Randall Weatherholt entertained with a movie party in honor of his sister, Miss Louise Weatherholt; and Saturday evening Mr. and Mrs. Marion Weatherholt were hosts and invited the members of class including Misses Lora Carson, Louise Weatherholt, Cecil Jolly and Chlora Mae Seaton. Mr. Joseph Ballman.

WANTED—To take subscriptions for all magazines. Also renewal for all magazines. Clubbing rates given. Mail orders received. Call or write Miss M. D. Babbage, Cloverport, Ky.

WANTED—To buy all kinds of logs at any time. A Zellers & Son, located on the Ohio River above Cannelton, Ind.

WANTED—Carpenters, Boat Builders, Joiners, Cabinet Makers, Millwrights, Tin-smiths, Plumbers, Pipefitters, and Painters for work on high class yachts and phonograph cabinets. Steady work. Our shops are sanitary, light and steam-heated. The Matthews Company, Port Clinton, Ohio.

DON'T WASTE TIME—Come to the fellowship store for lowest prices on gentleman's wear.—Wm. Cooms, Hardinsburg, Ky.

LOST—Watch—think I lost it at grocery store in Mattingly. Stopped there for lunch. Think I dropped it out of my pocket at that place. Description—gold filled case, Elgin, seven jewels, case badly worn. Reward for return.—W. L. Harrell, Lewisport, Ky.

GARFIELD

Miss Clara May, who has charge of the millinery department at the store of I. B. Richardson's this Spring, returned to her home in Olathe, last week.

Mr. and Mrs. Pete Haynes and daughter, Miss Ella, spent Sunday with Mr. and Mrs. Arthur Hager, of Custer.

Mr. Miles McCoy is visiting his son, Ulysses McCoy, at Daviess county.

Mrs. Percy Tucker and Miss Merna Tucker, of Harned, were here Wednesday shopping.

Dr. and Mrs. Harned were guests Sunday of Mr. and Mrs. H. B. Moore.

Mr. and Mrs. Will Dowell spent last week at Hardinsburg, the guests of their sons, Raymond and D. Dowell.

The 31st, Field Artillery from Camp Knox, enroute to Hardinsburg camped in our town Saturday night.

Mrs. Sudie Oliver, of Custer, has moved here.

Several from here attended the Sham Battle at Hardinsburg.

Can't Do Without It.

Mr. Jno. D. Babbage, Dear Sir: Enclosed find check for \$1.50 for subscription to The Breckenridge News for another year as we think we cannot do without The Breckenridge News. Yours truly, S. H. Robbins, Ammons, Ky.

VACATION TRIPS FOR THE PUBLIC

Railroads Are Now Urging People to Travel.

RETURN TO OLD METHODS

Not Much Will Be Chopped Off Transportation, but Excursion Rates Based on the One Way Charge Will Be Restored—Service Bureau Manager Says "Uncle Sam Is Out for Railroad Travel This Summer With an Ax."

Let those who are thinking of a vacation trip prepare for it now.

Last year vacations were mostly thinking. Discouragement of travel by the railroad administration ended preparations and punctured the outing hopes of almost everybody.

Now it will be different. In the breezy language of the manager of the main service bureau in Chicago: "Uncle Sam is out for railroad travel this summer with an ax."

Not much will be chopped off transportation, but there will be a return to old methods of excursion rates based on the one way charge instead of the favorite scheme under government control of no discount if a passenger prefers to ride back rather than walk.

As one way rates are higher than they used to be the new excursion rates will be higher than they were before the war. Nor will they be so low as before government control of the roads. How much lower than at present is best told by the manager of

the Chicago bureau of service. Howard H. Hayes, who says:

How They Figure It.

"Suppose you have a friend in the clothing business who gave you 20 per cent discount on a suit of clothes. Let that stand for the discount the railroads gave on a round-trip ticket from what you would have paid if you bought two single tickets, one each way. Now, you bought a \$30 suit of clothes and paid \$24 for it with your 20 per cent discount off. All right. Now, your friend says, the suit is worth \$40 and was worth that last summer when he wouldn't give you any discount and did not care whether you bought it or not. But this year you can have it with the same old discount, for \$32. See? It is not possible to go into the rates for this summer now; they will be announced about June 1 when the excursion season opens.

"Last year," continued Mr. Hayes, "our clothing store, so to speak, had nothing in the windows, no lights inside or out, and there was no desire to show goods. This summer we will be all stocked up and lighted, with rollers-in at the door. In the windows we will have announcements of more trains, more advertising, fast schedules, observation cars, liberal stop-over privileges, wide choice of routes, every inducement to travel in comfort and convenience."

Many Visit Parks.

When the government took over the roads all expenditure was stopped. This included booklets and folders formerly used by individual roads. There was then established the United States railroad administration bureau of service, national parks and monuments. Mr. Hayes was placed at its head. The purpose of this bureau was to invite travel to national pleasure reserves. All other kinds of travel was discouraged. The twelve great forest parks of the west were

BAFFLED THE PROFESSOR

Spiders Crawled Into a Tub Holding Seismograph.

Because a tribe of spiders decided that the glass case that incloses the seismograph in the basement of Blake hall, at Kansas university, would make an excellent home for their families, the physics professor who cares for the delicate earthquake instrument has been baffled for several days as to why the needles of the seismograph insisted on standing up in the air instead of resting on the recording drum.

The mystery was solved the other day when Professor Kester noticed that his arm was covered with spider webs after he had been investigating the situation. He investigated further and found that several webs attached to the recording needles caused them to stand up.

ARMY ENLISTMENTS INCREASED.
Decided improvement in the results of the war department's recruiting campaign was shown in the report for the week ended April 12. A total of 4,454 recruits entered the army.

OBSTACLES MET BY AGENTS

Extension Workers Exercise Patience and Tact in Overcoming Much Resistance.

(Prepared by the United States Department of Agriculture.)

In boys' and girls' club work prejudice and preconceived opinion, founded on lack of knowledge or misrepresentation, are two obstacles that county agents and demonstrators meet every day. To surmount them is not the easiest task; to convert opposition into hearty support is an achievement calling for unusual patience and tact. That both of these virtues are possessed in large measure by a majority of the extension workers may be deduced from the reports constantly coming to that bureau.

A farmer in Maryland had no use for "book farming." He upbraided his son, a member of a boys' club, for following the agent's instructions in seed corn selection. He called the test for 100 per cent germination "foolishness," and walked off in utter disgust. The boy, encouraged by his instructor, kept at it, demonstrated the proposition, grew the selected seed, and got a typical high-grade crop, a decided contrast to dad's. That settled it. The "foolishness" turned out to be "a good idea." The farmer has become an enthusiast.

At the very outset a woman demonstrator in a northern county of Texas was opposed by the parents of a bright village girl, anxious to become a member of a boys and girls' club. The mother was not a believer in "these new-fangled ideas" and the father had no sympathy with any "crazy theory stuff." In spite of the absence of any form of invitation, the demonstrator

POMP

A fine 3-year-old iron gray Nebraska Jack, 14 hands high, will stand the present season at my farm on the Stephensport road, one mile from the Hardinsburg and Cloverport pike.

Will serve mares at \$10 to insure a living colt to stand up and suck. Care will be taken to prevent accidents. This is a fine large bone Jack, good style and well bred.

Dick Gillion

To Buy Or Not To Buy!

That is the question. Then after you are fully convinced that you need to buy something, the next question is, where must I buy it? Then some one says, buy where you can get good quality stuff for the same amount of money, or less, than the same amount for which you can get it somewhere else. Then, besides this, you want to buy where you will receive honesty, prompt attention, courteous treatment and a cordial welcome. You will receive all these from us. We sell in retail and wholesale quantities Flour, Meal, Oats, Horse and Mule Feed, Dairy Feed and Hay. Your patronage solicited and appreciated.

Hardinsburg Feed Company.

A Meeting of Youthful Pig-Club Members.

spent the night with them. Before the family awoke in the morning she went into the kitchen, made biscuits according to the "new-fangled idea," helped in the preparation of the breakfast and —well, the biscuits conquered.

Today that little girl is the leading member of a club. During the past season her garden was such a success that she will have a bigger one this year, and the co-operation of her parents. And, according to them, "any time that agent comes this way she'll find welcome on the door."

One more instance, the three covering some of the important phases of agent work in the South: The colored farmers of a certain county in far Southern state used to pay no attention to crop rotation or diversification. They grew the same crops in the same fields, only such produce as suited their particular whim. Nor did they see any necessity for home sanitation. They didn't know anything about the necessity for either, and cared less. As for the county agent, he was an intruder. They have different ideas today. Not only do they grow the right crops, but also they take pride in the appearance of their fields and buildings. There is a friendly rivalry among them now, and the one-time intruding agent is sought to set them right in all their problems.

Thus opposition can be overcome today more than ever through the proper approach, the stick-to-it attitude, and the tact of the county and field agents and demonstrators of the extension service.

LIVE STOCK NOTES

When barley is fed to live stock, the grain should be crushed.

Quality is more important than size in selecting the breeding stock.

At present prices there is no cheaper grain feed for breeding ewes than oats.

No intelligent sheep raiser, no matter if he owns a large or small flock, will breed ewe lambs.

Both barley and oats should be ground for pigs, and a high protein feed like ground soy beans, tankage or linseed oil meal fed with them.

Stopping a Great Waste.

Millions of dollars' worth of fruit have been wasted in Florida during the quarter of a century. Hereafter nothing will be wasted as the drops, culms and ripes will all be utilized by new processes evolved by a clever chemist and scientist. The growers and the public generally will be helped by these processes, as the former will reap a benefit from the sale of their waste products and the latter will have the benefits of the manufactured products which are greatly in demand.

—Florida Times-Union

KIDNEYS WEAKENING?

LOOK OUT!

The housewife of Holland would almost as soon be without food as without her "Real Dutch Drops," as she quaintly calls GOLD MEDAL Haarlem Oil Capsules. They restore strength and are responsible in a great measure for the sturdy, robust health of the Hollanders.

Do not delay. Go to your druggist and insist on his supplying you with GOLD MEDAL Haarlem Oil Capsules. Take them as directed, and if you are not satisfied with results your druggist will gladly refund your money. Look for the name GOLD MEDAL on the box and accept no other. In sealed boxes, three sizes.

NECESSARY FEED FOR STOCK

Animals Help to Retain Fertility of Soil and Provide Profitable Use for Roughage.

(Prepared by the United States Department of Agriculture.)

Now that farming is to be restored to a peace-time basis, the United States department of agriculture believes that many lands formerly devoted to pasture or meadow but recently used for emergency grain production should be reseeded to grass.

The signing of the armistice found the United States with relatively large supplies of foods and relatively small supplies of feeds, with much land impoverished by having been planted to grain year after year, and with a still

Raise More Dairy Calves—the Nation Needs Them.

Increasing demand for meat and fats. Numbers of all classes of live stock have been maintained. Those of swine and sheep have been increased, the former largely, the latter slightly. But the quantities of forage and pasture

for live stock have been diminished.

Sound agricultural practice demands, the department thinks, the establishment of regular and satisfactory rotations so that fertility may be restored and the live stock carrying capacity of the land increased.

Live stock, since it helps to retain fertility on the land, provides a profitable use for large amounts of roughage and gives employment to labor throughout the year, should find a place on a larger number of farms.

Diversified farming should become more general, to the end that each farm shall produce the necessary food for its family and the necessary feed for its live stock.

Loss from preventable plant diseases should be guarded against by seed treatment and spraying.

Harvesting of fruits and vegetables before exposure to frost, and greater care during harvesting, packing, storing, and marketing, are urged, together with continued organized efforts for the prevention and control of diseases of animals.

TRY A WANT AD TODAY

DEVONIA

AQUA REMEDIUM AMERICANA

\$200 IN GOLD \$200 FOR A SLOGAN

WE WANT a slogan for Devonia—the American Medicinal Mineral Water—a slogan with punch and snap to it—something that really suggests the benefit which comes from using Devonia. And we are going to give \$200 in gold to the person who sends us the best slogan. Think of it! \$200 for just a few words. But Devonia, the finest of medicinal mineral waters the world over is worth it—worth your best thought and effort.

What Devonia Is.

Devonia is an American Medicinal Mineral Water. No other water has a record of such helpfulness to the ailing. Some of these for which it has been widely and successfully prescribed by physicians are: Constipation, Rheumatic Affections, High Blood Pressure, Hardening of the Arteries, Eczema and similar ailments.

Unlike many other mineral waters, Devonia comes to you just as it comes from its natural source, a thousand feet underground. Nothing is added to it to make it stronger. It is not condensed. Yet so effective is it that a tablespoonful to a glass of water is all usually required for effective results. Neither is it a powerful cathartic. Its properties are remedial, alterative and reconstructive. But to know what Devonia really is you should learn what it has done for others. Get some of our booklets, "The Story of a Well Man," or some of the others.

No Conditions To This Contest.

You may send in one slogan or many. You do not need to buy anything. All we ask is that the slogan be short and snappy. As we want only one slogan, there will be only one prize—\$200; but that is worth winning.

The judges will be the officers of The Devonian Mineral Spring Company, Mr. Thomas E. Basham, president of the Thomas E. Basham Company, our advertising agents, and the advertising managers of the four Louisville papers.

All slogans must be in our hands by June 1. The announcement will be made as soon thereafter as the judges can reach a decision, and their decision will be final. In case the winning slogan is suggested by two or more persons the prize will be divided equally. All slogans become the property of The Devonian Mineral Spring Company.

Mail your slogan to The Devonian Mineral Spring Company, executive offices Owensboro, Ky. For our convenience we ask you to use the coupon.

LEARNING TO BE A CIVILIAN

Discharged British Soldier Testifies That He Finds New Feeling Out of Uniform.

Is the glamor of uniform wearing off?

After three years of service clothes I have just spent my first days in civilian attire. Surprising to tell, I believe I have met with more civility out of uniform than in it. "R. G." writes in the continental edition of the London Mail.

Two possible solutions of this remarkable attitude occur to me. The first is that most officers appear to be rather stern and stand-offish in uniform. The other solution, and perhaps an equally probable one, is that the public is getting tired of seeing so many officers going about aimlessly with apparently nothing much to do except to spend money and kill time.

Naturally, I suppose, when I first went out in "civvies" I had the ingrained inclination to salute all superior officers I met and to prepare to take salutes from the ranks. It took me the best part of a day to overcome this impulse.

The "sir" habit was very strong, too. On my first morning as a civilian I had to see a colonel at the war office on business—business in which our standing was at least equal—and I immediately "sirred" him, of course. Force of habit, pure and simple.

Again there is the matter of running after an omnibus or across the road—in uniform one tries to make a point of not doing these things. Now, however, when "example" has not longer to be considered, I find it practically impossible to chase an omnibus or flee from an oncoming taxicab. The instinct is against doing so.

Apparently it is just as necessary to relearn how to be a civilian as it once was to learn how to be a soldier.

Protecting Airplane Propellers. An aluminum plating for airplane propellers has been devised for the purpose of protecting the wood from the influence of the weather, which has been a serious problem heretofore. The plating is a thin leaf which is incorporated in the finish of the propellers, and the idea was developed by the forest products laboratory at Madison, Wis., and placed in production by the war department. The process is practically 100 per cent effective in preventing absorption of water, particularly in the storage stage. A French authority states that 80 per cent of the French propellers produced are rejected by the pilots mainly because they are out of balance. This difficulty is due largely to unequal absorption or distribution of moisture and can be greatly reduced by an effective water-proofing coating.

Sweet Clover Often Valuable. A few tests have been conducted to try out the value of sweet clover as hog pasture, and the results have proved that this crop cannot be regarded as a rival of alfalfa. However, on soils which are too wet or too salty for alfalfa, the irrigation farmers find sweet clover a valuable forage crop. Rubber-boot farmers are coming to appreciate hogged-down corn and field peas as a desirable combination for pork production, in that it saves labor, produces satisfactory gains in the hogs, and adds manure to the soil. Extensive tests of "hogging corn" reported in the bulletin show gains of from 183 to 1,048 pounds an acre of corn when no supplementary feed was provided, and from 585 to 1,577 pounds an acre where the corn was supplemented with other feed. It is estimated that in these tests an average of about 450 pounds of corn was required to produce 100 pounds of gain when no supplement was used, as compared with an average of 400 pounds when the corn was not in combination with forage, late alfalfa pasture, or rape. Alfalfa pasture is preferable as an adjunct to hogged-down corn on irrigated lands, because of its cheapness, relative abundance, and reliability.

GOOD CROPS FOR PRODUCING PORK

Industry in Irrigation Country Subject to Periods of Expansion and Depression.

LACK OF KNOWLEDGE NOTED

Department of Agriculture Has Been Making Observations in Its Western Projects on Utilization of Field Crops.

(Prepared by the United States Department of Agriculture.)

"Gum shoe" farming for ham and bacon production does not presuppose web-footed hogs. It merely means that irrigation as practiced by some western farmers involves conservative use of moisture for production of forage crops which may be harvested directly in the fields by the porkers. The swine industry in the rubber-boot country has been subject to periods of expansion and depression. One cause is lack of knowledge as to the possibility of using certain irrigated field crops, and as to the value of these crops when measured in terms of pork production. If full advantage is taken of the wide range of feeds available to swine growers on irrigated lands, pork production can be conducted more extensively, and with more assurance of success.

Irrigation farmers interested in pork production have had to rely on results obtained in nonirrigated sections, and applied to localities where web-footed crops grow. This lack of definite information was especially noteworthy in the case of field crops, which in other sections of the country are pastured by hogs or hogged off. Hence, since 1912 the department has been making observations in its western irrigation projects on the utilization of irrigated field crops as hog pasture. These investigations include pasture tests with 149 lots consisting of 3,795 hogs pastured on alfalfa, sweet clover, field peas, and milo.

Alfalfa Needs Supplementary Ration.

Pasturing alfalfa with hogs has been demonstrated a satisfactory method of utilizing the forage, and one of the cheapest ways to produce pork. However, to obtain satisfactory results, the alfalfa pasture must be supplemented with some carbonaceous feed, such as a 2 per cent ration of corn, barley, milo, wheat, or shorts. Under such conditions one good acre of good alfalfa pasture will produce, with reasonable surety, about 2,500 pounds of pork a season. Exceptional gains, as high as 4,292 pounds an acre, were reported in the case of one lot of hogs pastured on alfalfa, and given a 3 per cent supplementary ration of corn. Naturally the gains on alfalfa depend on the size and quantity and quality of the supplementary feed. It is poor policy to try to make pork on alfalfa pasture alone without supplementary feed.

Hogs on alfalfa pasture, supplemented with about a 2 per cent ration of corn, barley, wheat shorts, or milo, will consume from 250 to 350 pounds of grain for each hundredweight of gain. In general the grain requirement increases as the hogs get larger. The feeding values of corn, barley, shorts, and milo as supplements to alfalfa pasture are so nearly identical that the choice among these side dishes should depend on prices, cultural adaptability, and general economic conditions. Where the grain is to be grown by the swine raiser, preference usually is given to corn, barley, and the grain sorghums, depending upon the adaptability of these crops to local conditions. An acre of good alfalfa pasture supplemented with a 2 per cent ration of grain will support 2,500 pounds of hogs during the entire growing season. The carrying capacity of alfalfa pastures increases rapidly with greater grain allowance, and it varies somewhat during the growing season with the rate of crop growth.

According to specialists of the United States department of agriculture an acre of good alfalfa pasture, if supplemented with a 2 per cent ration of corn, or barley, will support six to eight sows and 50 to 70 sucking spring pigs for about 60 days in early summer, during which the pigs should gain from 25 to 30 pounds apiece.

Sweet Clover Often Valuable.

A few tests have been conducted to try out the value of sweet clover as hog pasture, and the results have proved that this crop cannot be regarded as a rival of alfalfa. However, on soils which are too wet or too salty for alfalfa, the irrigation farmers find sweet clover a valuable forage crop.

Rubber-boot farmers are coming to appreciate hogged-down corn and field peas as a desirable combination for pork production, in that it saves labor,

produces satisfactory gains in the hogs, and adds manure to the soil.

Extensive tests of "hogging corn" reported in the bulletin show gains of from 183 to 1,048 pounds an acre of corn when no supplementary feed was provided, and from 585 to 1,577 pounds an acre where the corn was supplemented with other feed.

It is estimated that in these tests an average of about 450 pounds of corn was required to produce 100 pounds of gain when no supplement was used, as compared with an average of 400 pounds when the corn was not in combination with forage, late alfalfa pasture, or rape.

Alfalfa pasture is preferable as an adjunct to hogged-down corn on irrigated lands, because of its cheapness, relative abundance, and reliability.

HOME GARDENING IS FAVERED

Likely to Prove Profitable Investment of Effort This Year—Plan for Family Needs.

(Prepared by the United States Department of Agriculture.)

The home garden is likely to prove a profitable investment of effort this year as it has for the past several seasons.

Working in the Garden With a Labor-Saving Tool.

sons, in the opinion of the United States department of agriculture. The experience of the past few years has proved that persons who have sufficient land and spare time and who do their home gardening work intelligently and efficiently find it profitable. The relatively high prices of practically all foodstuffs tend to increase the saving effected, but the home garden should be planned with a view to meeting the family needs rather than of producing crops for sale on the market.

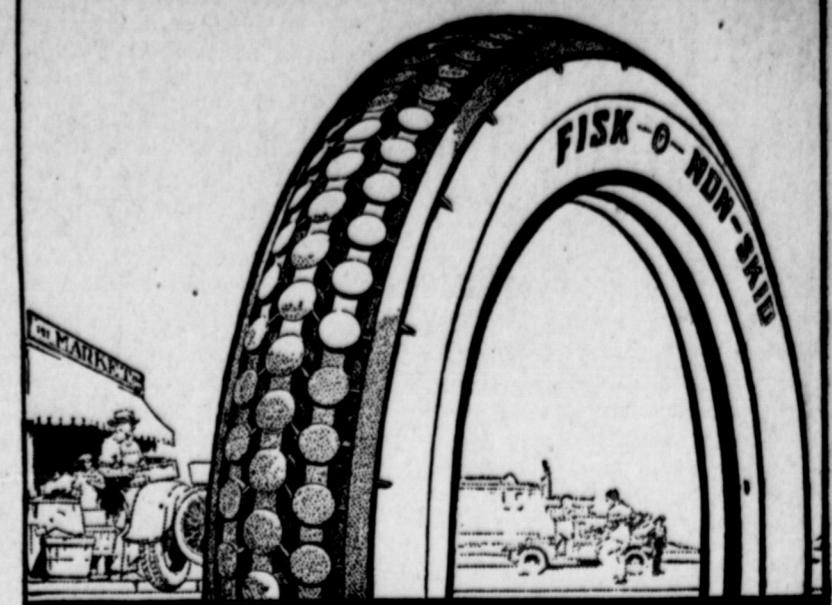

VARIOUS KINDS OF CHARITY

And Greater Far Than the Giving of Alms Is the Practice of Charity of Thought.

Someone has said that "Charity is the highest tree in heaven." It is a saying that we can well believe, for not only does charity cover a multitude of sins but it also covers its devotees with its solace and comfort.

It is to be feared, however, that there is a misconception as to the full meaning covered by the word charity. Many people seem to understand that charity consists solely in the giving of alms. And the fact is that almsgiving is merely one form of charity.

There is a charity that we can practice toward those of our fellow men who stand in need of alms. There are, indeed, many who are well provided with the goods of this world who stand in great need of charity. The charity of our thoughts is what we stand in need of.—Los Angeles Times.

Fisk Tires Going Onto More Cars Every Day

CONDITIONS these days—the larger demands on everybody's purse—are leading motorists everywhere to look more closely into the actual value of automobile tires.

We see it every day. See it in the steadily increasing demand for Fisk Tires.

Fisk Tires give certain very definite features that more and more motorists have come to look for—greater uninterrupted tire mileage, longer life, greater safety under all driving conditions.

As an enlightened motorist you want your tire expense cut down to where it really belongs. Next time—Buy Fisk.

PRINCE ALBERT

the national joy smoke

PRINCE ALBERT
CRIMP CUT
LONG BURNING PIPE AND
CIGARETTE TOBACCO

Copyright 1910
by R. J. Reynolds Tobacco Co.

SAY, you'll have a streak of smokeluck that'll put pep-in-your-smokemotor, all right, if you'll ring-in with a jimmy pipe or cigarette papers and nail some Prince Albert for packing!

Just between ourselves, you never will wise-up to high-spot-smoke-joy until you can call a pipe by its first name, then, to hit the peak-of-pleasure you land square on that two-fisted-man-tobacco, Prince Albert!

Well, sir, you'll be so all-fired happy you'll want to get a photograph of yourself breezing up the pike with your smokethrottle wide open! Talk about smoke-sport!

Quality makes Prince Albert so appealing all along the smoke line. Men who never before could smoke a pipe and men who've smoked pipes for years all testify to the delight it hands out! P. A. can't bite or parch! Both are cut out by our exclusive patented process!

Right now while the going's good you get out your old jimmy pipe or the papers and land on some P. A. for what ails your particular smokeappetite!

You buy Prince Albert everywhere tobacco is sold. Tidy red tins, handsome pound and half pound tin bandbox—and that clean, practical round crystal glass humidor with sponge moistener top that keeps the tobacco in each perfect condition.

that keeps Chesterfield's original flavor and freshness intact. Your Chesterfields never become either soggy or dry. They always reach you in prime shape for smoking.

And, Chesterfields do something for your smoke-hunger that you've always wished a cigarette would do — they "touch the smoke-spot" — they let you know you're smoking — they satisfy right down to the ground!

It's the blend that does it, and the blend can't be copied.

WITH THE HOME BOYS IN SERVICE

DWIGHT RANDALL
WRITES FROM FRANCE.

With the American Red Cross, Col. nuer LeBas, France, April 10, 1919. Dear Mother and Father: I received two letters from mother and one from daddy today and of course I am happy when I get letters from home. Am so glad my dear mother is feeling so much better and do hope she will steadily improve each day until she is strong and well again. Dad was sure glad to get your newsy letter. I love to hear of the men on the road and all connected with the L. H. & St. L. Why in the duce don't you write oftener? Well our trip to Germany has been post-poneed for 10 days. We are now under orders to move the 17th. You still address my mail the same and it will be relayed to us where ever we are. We will watch on "the Rhine". We electric men will install our electric plant at Cocham, Germany where we of our Division in the 1st. Army of occupation will be for a while. Well General Pershing reviewed our Company and we had a most severe test. Unfortunately the weather was bad. (A down pour every day) and we had to sleep on the ground and many of the boys are sick. General Pershing is one wonderful man, kindness, goodness and thoughtfulness for his men. We electricians had our electric plant disassembled and ready to move when in came orders not to move for 10 days and an announcement that a show was coming to this camp and to have things ready. I sure had to "hump" to get in foot lights and lights, and help get the plant installed again, but we succeeded.

"I feel like a woman made over again, since taking Trutona. It has helped me in every way. My husband thinks Trutona has performed miracles for me. I think Trutona is the most wonderful medicine in the world. It does all and is more than is claimed for it. It's a wonderful medicine for weak, nervous run down women."

As Mrs. Guinn says, the perfect tonic is remarkable as a reconstructive agency and especially so after attacks of pneumonia, influenza and the like.

Trutona is now being introduced and explained in Cloverport, Ky., at Wedding's Drug Store.

German officers rain cape that I got when we captured him from the dugout in the Verdun Sector. I guess I wrote you about him tho a dozen times. Now I am sending you two match box holders that I had made from German belt fastenings. They are just bent into that shape. They were taken from captured Germans. Now daddy I want you to keep one and give the other one to Mr. Hudson with my regards. Now don't give anything to any body else as I prize them too highly but want Mr. Hudson to have one of these souvenirs. When I am in Germany, I may be able to get souvenirs but that is not like capturing them. I got a Frenchman to shape these into match box holders just for a novelty. There is also a piece of German bread in the box. I got this piece of bread from a Frenchman, who had been kept a prisoner of war for over three years and was nearly starved. He was given this bread to sustain life and this is part of the piece of bread that was given him when he was released. It was old, hard, and the rats had been eating off of it. You can see what it is like tho and it is the same color etc. and just like that man lived on for more than three years. The little button is one I really took from a German's coat myself. I would not part with it; for my experience was so much when I got it. The emblem is one that was presented me while in the Alsa Lorane. There is a League here like the war workers are back home. They seemed greatful to me for different favors I had shown them and presented me with this emblem that I am sending also. I am sending you a French penny, equal to two cents in U. S. money, also a dime or 50 centimes, also a Franc, worth about 20 cents in U. S. A. money. It requires 5 francs and four big pennies to make a U. S. dollar. A big penny is 10 centimes, 5 makes $\frac{1}{2}$ franc. Am sending you all new money that you can see the markings well. Also sending two copies of our paper, "Stray Shots." You will see I have been honored by being made editor of our Company. This paper contains the name and

address of every man who was left in our Company, also the map and the travel of our Division. You can see we have been all over France, and walked nearly every step of the way. The dates show what battles we were in to. Capt. Warren is still with us. He asks about both of you, and sends regards. Must close for this time, write soon too. Devotedly your son, Dwight.

FROM PVT. PARKS WHO IS IN GERMANY

To My Friends in Breckinridge County: I am now in West Trier, Germany, getting along fine. Corp. Noble and I have been attached to the Seventh Corps Leave Aerea. We don't know how long we will be at this place, but we can say it sure is a nice place. It is about ten minutes ride up to Trier, from this camp where we are now on a street car. We can get a pass most any night we wish to go to town. We were in Trier, December and January. Moved to Luxenburg, to a little town by the name of Scheumiler. We were there one month, then moved to Oberkerschen stayed there a little over a month, and were then sent to the Seventh Corps Leave Aerea, to release some of the 89th Division so they could go home. We were among the first drafted boys to land in France. We have been over here one year today. (April 24, 1919) Have hiked all over France and through the edge of Belgium and are in Germany now. So we would like to land in the U. S. A. some time in 1920, for we feel we have done our bit. We went into the trenches about the last of June, and was there continually until the Armistice was signed. We were looking to go over the top at any time when we received the good news that the Armistice was signed and we were a happy bunch of boys. There were lots of flares shot up that night, red, white and blue.

I will always remember the morning of the fourteenth of October, when we went over the top in the Argonne forest. Corp. Noble was wounded in the left arm, by a machine gun bullet. He was in the hospital one month. I was sure glad to see him get back with the Company. The 5th Division has been working on a problem for some time, we have just found out, that they were trying to solve a way to drain the ocean dry so the fifth Division could hike it home. We have already hiked a little over 400 miles, with full field equipment. So I think we can make it if they get the problem solved out. Well I am in the K. of C. tonight, all the boys seem to be having a pretty good time. One of the boys is playing the piano. I remain as ever your friend, Pvt. Hubert Parks, 7th Corps Leave Aerea West Trier, A. P. O. 930.

Rev. Maniel Has a Vision of the Wrath to Come.

Dear Friends of all tribes and nations: Your Heavenly Father has warned you through the prophets and the holy apostles what would come in the last days.

Dan. 5; Joel 2; Isa. 2; Dan. 12; 1-2; Matt. 24; St Luke 21; Thess. 5; 2-4. With all of this He is warning you with your last warning as He spoke in Joel 2; 28-29. Now here is the message telling you to get ready and meet your Lord, who once walked on earth as we walk; talked as we talked; taught men the way, and said in one of the four Gospel's, (John 11; 23-25) "I am the resurrection and the life, so believe this message for it is true." My vision: I was lifted up in the spirit. I saw angels appear at the South and formed a straight line across to the North. There were so many angels I could not number and I saw in the middle of this line of angels standing still in the West, and each end came together in the East. It was a large circle and that large number vanished to a small circle which had the trumpets. I heard a voice, but I could not see from whence came the voice.

The voice I heard said: "This circle of angels with the trumpets, is the son of God." And the same voice had me to look at the trumpets saying they were, made of pure silver, and with my own estimation I judged the trumpets to measure 5 ft. long, 18 in. base and 1 in. top.

So I looked toward the South and backward to the North and the whole I saw another angel, and I looked elements were covered with angels going in four directions. The Lord revealed the vision to me. Here is what the vision means:

The long line of angles appeared at the South and formed a line across to the North. You could not number the angles. That represented the people in this world. When the middle of this line stood still at the West and each end came around to the East from the North and South, that represented the end of time and the great number I saw vanish meant this world will vanish when he comes. And the small circle of angles having the trumpets when you heard the voice saying, "This is the son of God," means we will not any more sun. The angel you saw appear going Southward means that the last angel will fly across crying with a loud voice, "Babylon is fallen!" When I looked backward to the North and saw all of the angels going in four directions with the elements darkened on account of so many, means resurrection. This is the way the angels will gather God's elect up at his appointed time.

So, my friends, I pray with my whole heart that you will take the Lord at His word and flee from His wrath to come.

From one of God's servants,
Frank T. Maniel, Big Spring, Ky.

Breckenridge News. Dear Sir: Am enclosing \$1.50 please send your paper to the following address, R. M. Cart, Union Star. Please send your next issue. Very truly Lillian Cart, Union Star.

BOOZE IN MEDICINES TO FOOL THE SICK

Read the label. You can bank on it of the label reads 18 to 20 per cent alcohol that such a medicine depends on its whiskey effect to sell it. Most of these "wonderful" tonics and "master medicines" make the patient feel temporarily better from the stimulating effect while at the same time they are undermining health.

"Number 40 For The Blood," contains but 9 per cent alcohol, and you can not drink it "ad libitum." One teaspoonful is a dose for an adult. It is an old doctor's prescription and has been successfully employed in blood poison, mercurial and lead poison, scrofula, rheumatism, catarrh, constipation, liver and stomach troubles. Under its use nodes, tumors, goitre and scrofulous swellings, that have withstood all other treatment, disappear as if by magic.

Made by J. C. Mendenhall, 40 years a druggist, Evansville, Ind.

Sold at Wedding's Drug Store.

Measuring Party

Saturday, May, 31st

Glen Dean, Ky.

On Saturday evening, May 31, a "Measuring Party" is to be given on the lawn of the Reeves' Store, Glen Dean, Ky.

Recitations and Refreshments

Something to entertain old and young.

Measure as you enter the lawn. 2c per foot.
